## CAD/RMS

## DID YOU KNOW? Your VisionTEK MobileCAD has many features

that folks are not taking advantage of. Test your CAD skills with this checklist of actions from your MDC without calling Dispatch.

- ☐ Sign on / Sign off
- ☐ Generate a report number
- ☐ Retrieve times from incident
- Swap stacked calls
- ☐ View/acknowledge stacked calls
- ☐ Enter beginning and ending mileage
- Create your own incident for low priority call types (law only)

## Data Systems

Team Leader: Gary Estes 4T50 513.695.1810 | Gary.Estes@wcoh.net 500 Justice Drive Lebanon, OH 45036 695.HELP Option #4

### What's up with the MDC connectivity?

Adapted from Gary Estes' address to the 9/15 Fire Communications Workgroup

Telecom recognizes that MDC connectivity has been less than (ok, very less than) acceptable these last few months so let's clarify what's been going on.

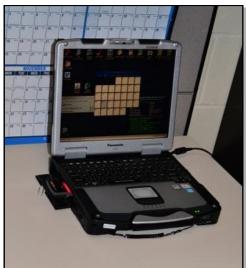

The Data Systems team is past Day 90 of working with Verizon to improve our connectivity. The two big thorns in this issue's side are:

- 1. Verizon is in the middle of switching from a 3G to an LTE network. We are on the old 3G network.
- 2. Verizon admits to overselling its product so they are low on resources but high on demand. Imagine 20 dogs feeding from one bowl - there's just not enough food or space around the bowl for every one. This is an issue that can be remedied with more towers to satisfy the booming sales of products (mobile phones, tablets, laptops, etc) in the Warren County area.

So why doesn't Verizon just put up more towers? It costs upwards of \$2 million per tower and some areas of Warren County aren't populated enough for any significant return on investment. Plus towers aren't always the solution - for example, Springboro's Airport can't have towers due to flying clearances.

The Data Systems team has been pulling people off existing projects and doing rotations every three weeks to test the complaining agencies' connectivity. Some agencies are reporting no connectivity but when we test the indicated spots, they're fine. So it's hard to pinpoint the exact areas that are truly having connectivity issues. The Sheriff's Office may be the best litmus test since they roam around the entire county. We can put the LTE network on their devices and see how well they connect. The west side of Warren County has LTE installed but as soon as WCSO drives into the eastern side of the County, the LTE is worse and doesn't have a compatible modem with the east towers.

If your agency has next to zero connectivity, it may be practical to pull your cards and drop off the system until things get fixed. This could be a few to several months. But every air card or USB card is approximately \$50 per month that Verizon is making off us while not delivering the connectivity we expect.

If it makes users feel better, Warren County isn't alone in our dissatisfaction. Many VZW clients are in our same position, prompting other vendors to pitch their products. Believe that Telecom is puttina the pressure on Verizon Wireless to deliver better results - Director Paul Kindell is working with Verizon leadership for a solution. Otherwise, we will consider their competitors.

More updates to come as we work through this issue.

## Telecommunications

## Radio Systems

### Fire Paging System to go Narrow Band 11/15/11

Notice from Telecom Director, Paul Kindell

**695.HELP** Option #5

**On Tuesday November 15<sup>th</sup>, 2011** we will follow the FCC mandate to convert our UHF Fire Paging System to Narrow Band FM. We've chosen winter in hopes that the need for tornado sirens will be reduced.

**Why Narrow Band?** To have more frequencies in the VHF, 150 MHz / UHF, and 450 MHz bands. Cutting the channels in half will open up new channels for the FCC to assign, doubling the usable channels in each frequency band.

This change affects your Fire Pagers, Fire Station Alerting Systems, and Outdoor Warning Sirens. Each will need to be converted to narrow band. Minitor 2s, 3s, and 4s will stop working on this date and can not be converted - you should have Minitor 5s by this time.

**Programming locations** 9am-9pm on November 15th for you to bring your pagers to be converted at no cost to you. It takes about 2 minutes per pager.

**It is your agency's responsibility** to schedule with your service provider and pay for all changes to your station alerting systems and outdoor warning sirens. Don't assume someone will take care of this for you - especially the outdoor warning sirens - make sure you know who is responsible for them.

	If you are	Report to Station	
	Station		
	11	19	
	15	19	
	19	19	
	21	19	
	28	91	
	31	EOC	
	46	EOC	
١	51	51	
1	56	51	
	71	71	
	76	71	
	81	71	
	91	91	
,			

**Please notify Telecom once your sirens have been converted**. Please note, you can not convert to narrow band prior to the paging system being converted.

**All Tornado Sirens must also be converted** to DTMF or Touch Tones at this time if they are not already. Please coordinate the conversion to touch tone with Telecom. The switch to touch tone is simply a programming change to the siren and can be done at the same time as narrow banding.

And then there was one... the 280-foot

guyed tower was dismantled in just under 5 hours on Sat, Sept 24th. Look for the time-lapse video on Telecom's Facebook,

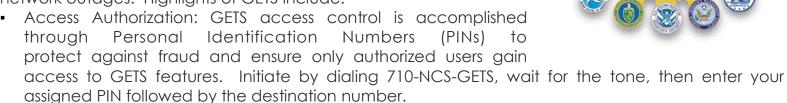

## Telephony

### **Get Wireless Priority Service during Emergencies!**

Contributor: Adela Dingman

#### **GETS Government Emergency Telecommunications Service**

Purpose: GETS is an emergency service designed for use when national security and emergency preparedness (NS/EP) personnel are unable to complete emergency calls through their regular telecommunications means. GETS uses a calling card to provide Federal, State, local government, and industry NS/EP users with a higher probability of call completion during times of natural or man-made disasters or emergencies that cause congestion or network outages. Highlights of GETS include:

• Enhanced Routing: GETS calls use extensive software enhancements to the PSTN's robust network of interconnecting paths between switches. With these enhancements to the grid of multiple switch connections, numerous switch failures in the PSTN could occur without disrupting GETS calls.

#### Wireless Priority Service (WPS)

Telecom's Telephony division has given our Public Switched Telephone Network (PSTN) a higher probability of call completions within the wireline and wireless portions of our phone system. By subscribing to this program directed by the DHS, the Warren County phone system benefits from the following highlights:

- Priority Treatment: WPS is an enhancement to basic cellular service that allows National Security & Emergency Preparedness (NS/EP) personnel calls to queue for the next available radio channel.
   Priority handling is provided from call origination, through the cellular and public telephone networks, and to the dialed destination.
- Access Authorization: WPS is invoked by dialing \*272 prior to the destination number on cellular devises with the WPS feature.
- Ubiquitous Coverage: WPS is available nationwide in Global System for Mobile Communications (GSM) and in Code Division Multiple Access (CDMA) networks. For the latest information on WPS carriers and coverage areas, see "Carriers" on <a href="http://wps.ncs.gov">http://wps.ncs.gov</a>.
- Service Authorization: To subscribe to WPS, see "First Time Requestor" on <a href="http://wps.ncs.gov">http://wps.ncs.gov</a>

This program was helpful to our region with August's east cost earthquake, giving emergency services and public safety agencies priority on the wireline and wireless phone systems.

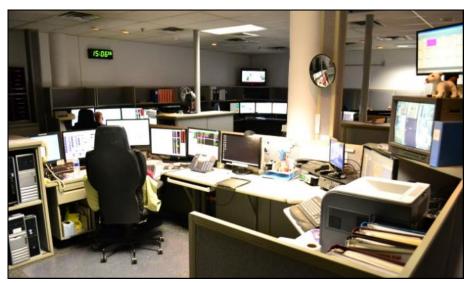

## Emergency Services

### **HELP DISPATCH - UPDATE YOUR CALL-OUT LIST**

Submitted by OM, Nancy Machulskiy

Melissa Bour's crew recently took an afterhours call to page out the sewer department—the caller had raw sewage coming into their bathroom fixtures. After 15 minutes, the caller called back and we assured them that we were getting help. Each time, we paged the provided contact on our call out list. Eventually, we found out that not only had their numbers changed, the contacts and procedure were different! It took an hour to get

the caller help, and they threatened to call the I-Team and Commissioners because we wouldn't help them!

Many agencies trust the Communications Center to answer phones afterhours, on holidays, and during the weekend when their offices are not staffed.

If we provide you with this service, help us to better assist your agency and your callers by updating your call out list with correct names and numbers.

We have no way of knowing when members of your staff retire, get promoted, or leave to take another position. Send your changes in writing to the Emergency Services administrative office at 500 Justice Drive.

Welcome Emergency Services' newest Dispatcher - Keith Fudge! From Clearcreek Twp, Keith graduated from Sinclair College in 2009 with an Associates degree in criminal justice. He now resides in Deerfield Twp and also works part-time in the communications department at Kings Island. Welcome Keith!

### Live Burn Training for Mason & Deerfield Twp

On September 8-10, you may have seen smoke rising over Interstate 71 near the Socialville-Foster overpass. Don't be alarmed! It was live burn training for Deerfield & Mason firefighters! Check out the short highlight reel or full length video of these men and women in action on Telecom's Facebook or YouTube page!

#### Deerfield Township Fire Rescue Places New Rescue Truck And Engine In Service

Contributor: Lt. Patrick Strausbaugh

With long awaited anticipation, Deerfield Township Fire Rescue has a new Rescue truck and Engine on the road. DTFR took delivery of the new trucks in July. After mounting equipment and training all personnel, they were placed in service at the end of the month. The rescue will be responding from Station 57 and the Engine will be housed at Station 56.

Ferrara Fire Apparatus Inc. was chosen by a staff committee after careful consideration between three different manufacturers. Cost of the new apparatus under \$490,000. Captain Mark Miller states, "The best overall quality of Ferrara will expand the life of service for our needs while increasing our response capabilities." The new apparatus are part of the overall plan to extend the length of service for all DTFR apparatus while cutting maintenance cost on older vehicles. "We are really excited about the technical rescue capabilities this rescue truck has," says Battalion Chief Jerry Gooden. The new engine will replace a 1989 Seagrave pumper.

#### Technical Specifications:

#### 2011 Ferrara Igniter XD Rescue

- Cummins ISL 425 motor
- GVWR 53,000 pounds
- Length 35 feet 9 inches
- Width 102 inches
- Height 10 feet 8 inches
- 300 gallon booster tank
- Waterous CS 300 gpm PTO pump
- Harrison 10kw MPC Hydraulic Generator
- 15,000 lbs Warn electrical winch
- 6000 psi SCBA cascade refill compressor
- Full functioning rear command center

#### 2011 Ferrara Igniter XD Engine

- Cummins ISL 425 hp motor
- Allison EVP 3000P Transmission
- GVWR 57,000 pounds
- Length 33 feet 5 inches
- Width 102 inches
- Height 10 feet 3 inches
- Waterous CSU 1500 GPM single stage pump
- Harrison 10kw MPC Hydraulic Generator

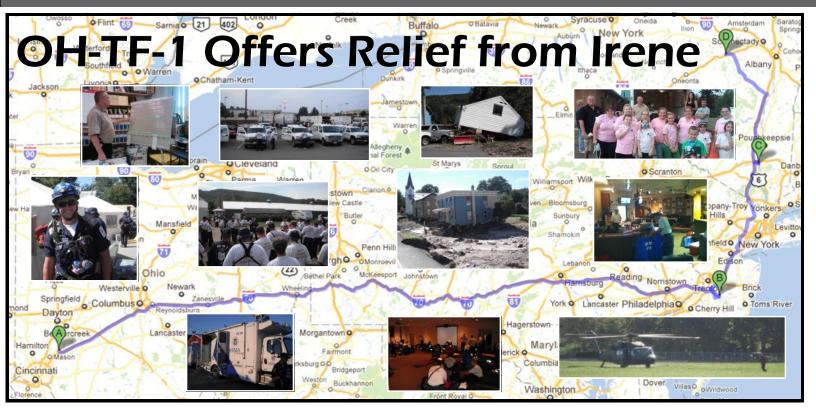

Contributors: Jeff Turner, FTFD & OH-TF-1 / Asst. Chief John Daly, FTFD / Chief Jeff Kruithoff, Springboro PD

Most of us viewed Hurricane Irene's havoc from the safety of our still-standing homes, curled up on our overstuffed couches, while news reporters spoke to us through our wall-mounted televisions. However, some Ohio residents experienced the wreckage first hand - the men and women of Ohio Task Force 1 - including Warren County's Jeff Turner & Russ Whitman.

On August 26th, the team of 80 personnel made pit stops in Pennsylvania and McGuire AFB in New Jersey where they made bunk in a bar - yes, a bar! Glued to the televisions, they waited for the eye of the hurricane to cross their path then completed their trek to Stewart Air National Guard Base in New York. When morning broke, OH-TF-1 geared up and drove north to their final destination, Cobleskill, NY. They set up BOO (base of operations) before finally going to sleep at 3:00am. With just three hours of sleep, work began with people being sent via ground and air. Turner was assigned to an air crew where they were dropped at open fields then sent to walk the streets checking homes for people trapped and/or needing medical attention, along with supplying water and MRE's to those in need. In Turner's words, "we had to hoof it far and fast but it truly was amazing!"

Where you see rubble was once roads and houses. The water washed a lot away - including vehicles that now litter roads and lawns. The hardest thing to see were people being dug out of their houses and flown to medical care. Turner reflects, "We arrived in what seemed open arms from the town... They asked if they could feed us one of the evenings, but due to situations we ordered catering and the town insisted on serving it to us. It was a true heartening experience to see how grateful these people were and made us proud of what we were doing."

In addition to Turner's experience, Franklin Township's Chief Russ Whitman was also part of the OH-TF-1 team where he played in integral role aiding Windham, Green County, New York. The town suffered road flooding but luckily no injuries as reported in Situation Update 07Sept11, 1800 Hours. He is pictured above in the top left and right photographs.

## The Run

### Still grateful after two years...

(A 9/11/11 letter from Greg Wheeler, rescued by Wayne Twp first responders)

Hi to all at the Wayne Township Fire Department,

I was thinking about all of you that my wife and I had the joy of meeting while on vacation earlier this year. I still don't remember the first time we met... With 9-11 coming tomorrow, I wanted to send another Thanks to all of you for what you do, and especially for your wonderful help back on May 23, 2009, when I was laying in a ditch all broken and bleeding. Without your expert help and care, today I might not be here writing this.

I know as a person gets older, we tend to eventually forget some things, but

I will never forget that I went through a horrible crash, and I will never forget how you helped me in a serious time of need. I still think it takes a special kind of people to do the jobs each of you do, and I will always appreciate each of you for being the kind of people that you are. I look at the photos of all of us together in front of the rescue vehicle often. I have all the photos from that afternoon mixed in with a large collection of photos that displays a new one every two minutes on my computer "desktop" background. I like to keep them cycling thru like that so I never forget.

Thanks so much again, Greg and Donna Wheeler

### Blue Card System at Mason FD

Contributor: Lt. Chris Heywood, CMFD

In 2010, Mason Fire Department officers and OIC's began enrolling in Chief Alan Brunacini's Blue Card Hazard Zone Management Training Program. The program requires each officer to complete a 50-hour online program followed by a three day, 24-hour simulation check-off at a Command Training Center. Blue Card has helped CMFD standardize their command operations for NIMS Type IV & V incidents.

The program focuses on the 8 critical fire ground factors (building, occupancy, arrangement of the structure, fire, life hazard, resources, action, special circumstances) and the 8 functions of command (assuming command, sizing-up the situation according to the critical factors, communicating the plan in the initial radio report, deploying the proper resources to match the incident action plan, organizing the incident according to the strategic plan, then, being able to revise and reorganize the incident action plan as the incident escalates, and finally transferring/terminating command of the incident). These create a system-wide accountability for 99% of the incidents the department responds to each day. For Mason, the goal is to create a safer, more manageable hazard zone and ensure that everyone goes home at the end of their shift.

Mason's new policies send the first arriving unit to the scene and all other units' automatically go into level one staging until the IC assigns them a task. This does several things:

- It establishes one IC for the incident and they are responsible for assigning tasks according to the fire ground critical factors and their initial incident action plan.
- Level one staging prevents units from auto-assigning themselves and allows the IC to assign units according to his action plan and provides accountability for each company.
- Level one staging will ensure the incident commander is able to maintain an accountability system according to the task he has assigned, as well as account for unassigned units in level two staging.

Click here for the full article written by Chris Heywood, stored on Telecom's FTP site.

Or visit www.bluecardcommand.com for more information on the upcoming conference - October 17-19, 2011.

## Springboro Safety Expo October 8th

Contributor: Officer Lisa Walsh

Geared towards kids and families, this Safety Expohosted by Springboro PD should be a great time! Swing by the Springboro City Building (320 W. Central Avenue) from 4-7 pm for the following:

- Apparatus tours from SWAT, Drug Task Force
- Police & Fire equipment
- Free giveaways, raffle drawings
- Bike safety demos and info
- Internet/cell phone safety
- Police & fire booths
- Careflight will land
- Halloween safety
- Car seat safety
- Food vendors
- Child ID kits
- Jail tours

# Halloween Safety

### Before your child leaves the house...

- 1. Check Ohio's eSORN database for nearby sex offenders and avoid these addresses.
- 2. If you're not accompanying your child, know their route and check in every half hour.
- 3. Make sure your child's costume is fire proof or treated with fire retardant.
- 4. If they are wearing a mask, make sure the eyes holes are large enough for good peripheral vision.
- 5. Discuss how to safely cross streets looking in both directions, staying visible on the sidewalk and in packs.
- 6. Halloween is NOT a night for vandalizing houses, ripping down decorations or abusing cats!
- 7. Serve them a filling meal so they won't be as tempted to gorge on candy at the end of the night.
- 8. If your child is carrying a prop, make sure the tips are smooth and flexible enough to not cause injury if fallen on.
- 9. Include a flashlight, glow stick, or reflective tape to their costume to make them stand out for distracted drivers.
- 10. Teach your kids about not getting into stranger's cars for a quicker ride home after a long night.
