

# Bi-Annual Radio System Upgrade

from version 7.15 to version 7.17.

March 20-29 with contingency days on the 30<sup>th</sup> and 31<sup>st</sup>

Part of our radio system includes an upgrade every other year that keeps us state of the art and current with the latest systems being built and shipped around the country. **We anticipate our system going into site trunking some days** which is more disruptive to dispatchers than end users.

*Site Trunking = our county's 9 towers get disconnected from the rest of the state. If you are in Warren County when Site Trunking begins, local talkgroups work as normal and you'll only notice issues if you leave range of our towers. If you're out of the county when site trunking begins, (e.g. on TAC 3 in Butler County), you won't hear people talking on TAC 3 if they're associated to a Warren County tower. There's essentially a barrier around our County separating us into a standalone system like when on our analog system.*

If you are in Warren County when Site Trunking begins, local talkgroups work as normal and you'll only notice issues if you leave range of our towers. If you're out of the county when site trunking begins, (e.g. on TAC 3 in Butler County), you won't hear people talking on TAC 3 if they're associated to a Warren County tower. There's essentially a barrier around our County separating us into a standalone system like when on our analog system.*

**Motorola will also be upgrading the Dispatcher consoles to Windows 10** which may affect auto toning. There is a lot of work scheduled and lots of precaution taken in case of problems.

Your talkgroup with Dispatch		Use in Site Trunking
PD Primary 1	→	NO CHANGE
PD Primary 2	→	
Inquiry	→	
Fire Primary	→	
Franklin PD	→	
Franklin Fire	→	
Lebanon PD	→

### Dispatch Procedure

Dispatch Backup Radio		Use in Site Trunking
83 BKUP 1	→	83 SCHOOLS
83 BKUP 2	→	wandering, TACs
83 Clermont 1	→	Fire Primary
83 Clermont 2	→	PD Primary 2
83 Montg Co 1	→	PD Primary 1
83 Montg Co 2	→	Inquiry
83 MARCS 1	→	
83 MARCS 2	→	

Also happening: the Fire Paging System upgrade will occur simultaneously with expected cutover in early to mid-April after the radio system is upgraded.
