## ePCR: Resident / Non-Resident Field Aids Billing Process

*Intended Audience: Warren County EMS agencies who utilize Zoll TabletPCR*

### Transition Period between Version 2 and Version 3 billing

EMS crews have a new *Residency –v3* field under *Patient > Patient > Home Address*. Crews should immediately begin using both the v2 & v3 Residency fields. Within three weeks, Telecom will remove the v2 field, making only the v3 field required.

This supports Medicount’s transition to Version 3 Billing, ensuring your runs are properly billed.

#### Residency - v2:

Resident
Non-Resident

#### Patient Resides in Service Area?:

Not a Resident Within EMS Service Area
Resident Within EMS Service Area

### ALS vs BLS

Telecom is working to identify any additional fields which we should enable/require to help Medicount bill your runs as ALS vs BLS.

Contact Applications Analyst Joseph Newton at 695-HELP regarding this technical bulletin.
